Summary

Computer science student at Cairo University with a solid foundation in AI, machine learning, and full-stack web development. Experienced in building and deploying real-world applications using Python, C++, Flask, and modern ML frameworks. Successfully completed multiple projects, including spam detectors, image filter apps, and computer vision models. Certified by IBM, Google, and Huawei in AI and cybersecurity, with hands-on experience in NLP, computer vision, and inference deployment. Interested in contributing to impactful projects in fast-paced environments.

Career Objective

Motivated and skilled computer science student seeking an internship or entry-level opportunity in AI or software development. Passionate about turning ideas into practical solutions through intelligent systems, clean code, and collaborative teamwork. Aims to grow through real-world challenges while contributing to meaningful technological innovation using modern tools and strong problem-solving skills.

Experience

NLP Engineer Intern, Elevvo Pathways, Cairo Jul 2025 – Aug 2025

- Designed and created NLP pipelines for downstream tasks.
- Fine-tuned transformer models for custom use cases.
- Lightweight inference applications are deployed.

Information Technology Intern, FPi-Future Pharmaceutical industries, Cairo Aug 2025

- Enhanced a custom task management system by adding a "comment" feature that improved teamwork.
- Contributed to an Order Receiving mobile app (Kotlin + Django API), partially integrated with the JD Edwards (JDE) ERP system.
- Applied back-end development best practices while gaining hands-on experience with .NET and Angular.

Education

Cairo University, BS in Computer Science Sept 2023 – July 2027

- GPA: 3.6

Certifications

Microsoft Machine Learning Engineer, DEPI Dec 2025

Python Basic Certificate, HackerRank Jul 2025

Object Oriented Programming Specialization, University of London – Coursera Sep 2024

IBM AI Engineering Specialization, IBM – Coursera Sep 2024

Google AI Essentials, Google – Coursera Sep 2024

HCIA – Artificial Intelligence, Huawei ICT Academy Sep 2024

Skills

Technical Skills

Python, C++ , HTML/CSS
Scikit-learn, PyTorch
Django
Git

Personal Skills

Problem Solving
Communication
Teamwork
Time Management

Languages

Arabic – Native
English – C1
French – A2
German – A2

Projects

AI Image Captioning

github.com/YoussefElebiary/VisionScribe/

- Built an image captioning model using a CNN encoder, and LSTM decoder to generate descriptive captions for images.
- Implemented beam search algorithm for text generation.
- **Tools Used:** TensorFlow, Flask, HTML/CSS

Spam Email Detector

github.com/YoussefElebiary/NoMoreSpam

- Developed a web application using an SVM model to classify emails as spam or ham.
- Enabled user input of email text and displayed prediction confidence scores.
- **Tools Used:** scikit-learn, Flask, HTML/CSS

Fake News Detector

github.com/YoussefElebiary/TruthGuard

- Built a web app that classifies news articles using XGBoost and LightGBM.
- Allowed users to input text and choose between two model variants (standard/lite).
- **Tools Used:** scikit-learn, Flask, HTML/CSS

Recipe Finder Website

github.com/YoussefElebiary/RecipeHub

- Designed a cooking platform for users to browse, search, and filter recipes.
- Implemented the back-end with Django and styled the front-end with custom CSS.
- **Tools Used:** HTML/CSS, Django

Image Editing Software

github.com/YoussefElebiary/PhotoWizard

- Created a desktop GUI application for applying visual filters to images.
- Supported multiple formats and added real-time previews.
- **Tools Used:** C++ , Qt

Extracurricular Activities

AI Committee Member, MSP Tech Club

May 2025 – Present
